

Don't Terminate Our Security

Rail Workers are saying no to the increased risk to their safety at all terminating locations!

Station Reform has slashed station positions across the network and highlighted the need for action now by RailCorp and the Government at Terminating locations to increase security.

We demand action now!

We say **NO** to:-

Reducing staff at Terminating Stations

RailCorp leaving passengers to fend for themselves

Less security for Guards and passengers

Less security for disabled and aged passengers
